VACCINATIONS IMPORTANT?

- Vaccination protects us from serious illness and complications of vaccine-preventable diseases which can include paralysis of limbs, brain damage, and death.
- It is important for individuals to keep updated of their vaccines since it can be a matter of life and death.

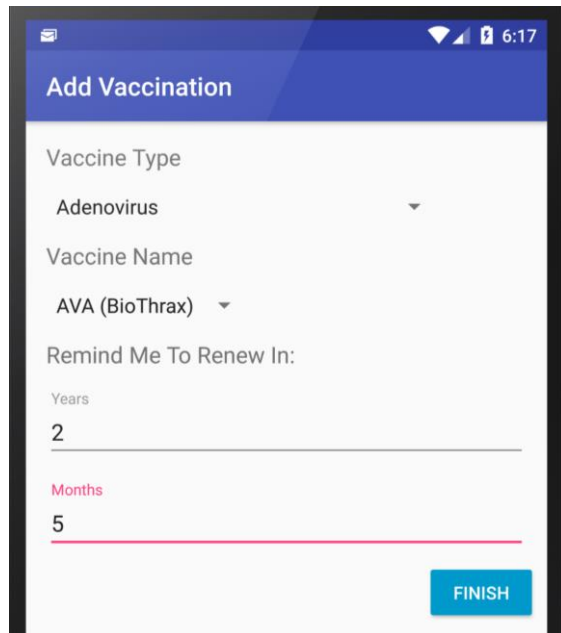

SOLUTION

- Introducing Ivory, a secure android app that allow users to record the dates of their vaccination.
- It also reminds users of their next vaccinations.

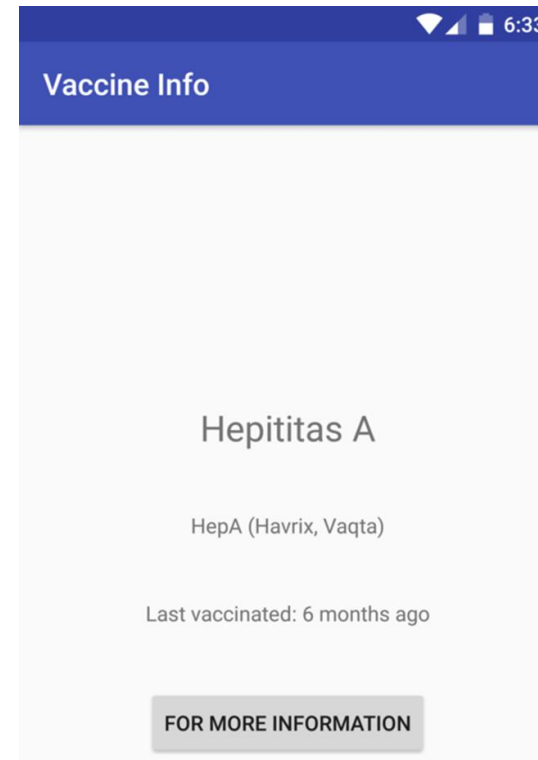

HOW IT WORKS

- After login in, user can add vaccinations that they need reminder for.

The screenshot shows a mobile app interface for adding a vaccination. The title bar is blue with the text 'Add Vaccination'. Below the title bar, there are three input fields: 'Vaccine Type' with a dropdown menu showing 'Adenovirus', 'Vaccine Name' with a dropdown menu showing 'AVA (BioThrax)', and 'Remind Me To Renew In:' with two sub-inputs: 'Years' with the value '2' and 'Months' with the value '5'. A blue 'FINISH' button is located at the bottom right of the form.

The screenshot shows a mobile app interface for vaccine information. The title bar is blue with the text 'Vaccine Info'. Below the title bar, the text 'Hepatitis A' is displayed in a large font. Below that, the text 'HepA (Havrix, Vaxta)' is displayed in a smaller font. Below that, the text 'Last vaccinated: 6 months ago' is displayed. At the bottom, there is a grey button with the text 'FOR MORE INFORMATION'.
